PROFILE

Final-year Software Engineering undergraduate at ESU Colombo. Highly motivated developer with hands-on experience in Full-Stack Web Development. Proven ability to manage projects and a strong interest in building scalable, real-world applications using modern technologies.

PROJECTS

LoadGod – Heavy Vehicle Rental & Booking Platform

- Developed a comprehensive rental platform using the MERN Stack.
- Implementing an AI-based vehicle recommendation engine to enhance user experience.
- Focusing on efficient state management and responsive UI design.

Web-Based Gym Management System

- Served as the Project Manager, overseeing the full development lifecycle.
- Developed backend logic using PHP and MySQL and designed an intuitive UI/UX.
- Streamlined member registration and payment tracking functionalities.

Loyal Home Nursing Care – Service Management Platform

- Technologies - HTML, CSS, JavaScript, PHP, MySQL.
- Designed and developed a professional service-based website for a home nursing provider to manage client inquiries and service listings.
- Implemented a secure contact and booking system to streamline communication between the agency and clients.
- Optimized the user interface (UI) for better accessibility, ensuring elderly users and their families can navigate the site easily.
